You don't often get email from datasupportrd@elsevier.com. [Learn why this is important](#)

CAUTION: This email originated from outside of Salisbury University. Please exercise caution when clicking links or opening attachments from external sources.

Dear Joshua Brull,

Thank you for contacting the Data Support team about the use policy for data mining. I'll be glad to assist.

Per the rule that data mining scope is limited to a specific discipline, does even a count of all related data on a topic, i.e. climate change, which would entail works counted in different disciplines?

- it can be across disciplines

With regards to the query about the Scopus categorical codes, let me consult this with the Scopus Team and I will update you once I have received their response. Thank you for your patience.

Please let me know if you have any questions.

Kind regards,

Jun Bautista

Per the rule that data mining scope is limited to a specific discipline, does even a count of all related data on a topic, i.e. climate change, which would entail works counted in different disciplines?

Also, are the SCOPUS categorical codes directly-related to the specific disciplines?

If you are not satisfied with how your issue has been addressed, please contact our [Complaint Team](#)
